PROFILE

Versatile, multilingual IT-focused student with certifications including Microsoft Azure, Security, and Data Fundamentals. Skilled in system administration, network configuration, data analysis, and digital content. Award-winning Skills Canada competitor experienced in virtualization and workflow optimization.

EXPERIENCE

Marketing Assistant, Toronto District School Board - FOY

June 2025 - Present

- Perform data analysis on over 50 social media posts across 4 platforms to build evidence-based recommendations.
- Create a comprehensive social media report analyzing data across all departmental social media platforms utilizing SproutSocial, delivering actionable insights and recommendations.
- Conduct targeted research to support system improvements and workflow optimization.
- Applied logical problem-solving to streamline digital processes and efficiently research.
- Produce content with a focus on clarity and usability aligning with departmental goals.

Digital Content Specialist, Toronto District School Board - FOY

June 2024 - Aug. 2024

- Built a digital inventory system to improve workflow and resource tracking.
- Developed interactive digital biographies, increasing inventor profiles by 50% and enriching exhibits.
- Created social media videos and posts that boosted engagement.
- Enhanced visitor interaction and staff training by integrating 3D printed models into exhibits and creating detailed guides and workshop materials.

ACHIEVEMENTS

Gold Medal for IT Network Systems Administration - Skills Canada, TDSB

Mar. 2025

- Configured and deployed a personal Windows OS on a restricted TDSB machine using Linux command-line tools and virtual machines. Demonstrated strong skills in cross-platform system troubleshooting, OS installation, and virtualization under strict time and security constraints.

Bronze Medal for IT Network Systems Administration - Skills Canada, Ontario Level

May 2025

- Built a custom virtual network using multiple VMs, configuring Windows systems to meet strict technical requirements. Performed advanced tasks inside VMs—including user policy setup, system security configuration, and network configuration. Used Cisco IOS commands to configure an advanced network in Cisco Packet Tracer. Delivered a comprehensive step-by-step technical report under tight time constraints.
